HACKATHONS

- 1st place in [chegg hackathon](#) 2023.
- 3rd place in [phoenix hackathon](#) 2022.

EDUCATION

Computer Science

HIT College, Holon

2021 - present

- Third year in computer science degree

Cisco Certified Network Associate Industrial (CCNA I)

"appleseeds", "Net@" , Ramle

2014 - 2015

- Network administration, routing, switching, Cisco IOS and security.

High School Diploma

"ORT Lilienthal" High school, Ramle

2012 - 2016

- Full matriculation
- 5 points in Computer Science
- focusing on Java programming to solve complex problems and fix bugs.

LANGUAGES

Hebrew: Native language

English: Highly skilled

PROFILE

Software developer FullStack developer with high self-sufficiency Ability to work on several projects at the same time Excellent human relations Experience working in a team and as an individual and the ability to deal with complex technological challenges

PROJECTS

• Library Management System

FullStack web application for managing a library's book inventory. It allows users to view, add, ,edit, search, and delete books from the database. The application is built using Node.js, Express, and PostgreSQL for the backend, and EJS for rendering dynamic content on the frontend.

• NBA Scores FullStack Project

web application built with Node.js and Express that fetches and displays real -time NBA scores using the RapidAPI service. The scores are dynamically updated, showcasing the most recent games played in the last month.

• Simon Game FrontEnd Web App

This project is a web application built using JavaScript, HTML, and CSS that replicates the popular classic memory game. The game features four colored buttons that light up in a random sequence, which players must then repeat accurately. The sequence length increases by one with each successful round, challenging players' memory and concentration skills.

SKILLS

Programming Languages:

- C, C#, C++, Java, Python
- JavaScript, HTML, CSS

Database Management Systems:

- MySQL
- PostgreSQL
- MongoDB

Web Development Frameworks and Tools:

- React
- Node.js
- Express
- Bootstrap
- Postman (for API testing)

Version Control:

- GIT, GitHub

API:

- API: REST, JSON

Additional Skills:

- Strong analytical and problem-solving skills
- Excellent communication and teamwork skills
- Experience with working under pressure
- Passion for learning new technologies
